PROFILE

Computer Science Engineering student specializing in Gaming Technology with hands-on project experience in Unity, AR/VR, AI/ML, computer vision, Java, Python, C#, JavaScript, and interactive learning systems. Interested in software development, immersive applications, AI-enabled products, and user-centered engineering roles.

SKILLS

Programming:	Java, Python, C#, Data Structures, OOP fundamentals
Web Development:	HTML, CSS, JavaScript, frontend fundamentals, backend and API fundamentals
AR/VR & Game Tech:	Unity, Augmented Reality (AR), Virtual Reality (VR), Mixed Reality (MR), Extended Reality (XR), 3D development
AI/ML:	Machine Learning, Artificial Intelligence, Computer Vision, NLP fundamentals
Design & Collaboration:	UX design, user flow planning, interactive learning experiences, documentation, cross-functional collaboration

WORK EXPERIENCE

NPTEL Summer Intern - IIT Roorkee

Prof. Prabhjot Singh Chani | In-person | 12 weeks | May 27, 2026 - Present

- Selected for the NPTEL Summer Internship 2026 at IIT Roorkee under Prof. Prabhjot Singh Chani.
- Expected to contribute to institute-guided project work, technical documentation, and final internship reporting.

PROJECTS

SPEAR Grant Project 2025 - Augmented Reality-based Interactive Vocabulary Learning System

In Progress | VIT Bhopal University

- Collaborating in a 15-20 member faculty-guided team to build an AR-based vocabulary learning system for education.
- Designed UX flows, interaction screens, and learning activities for interactive vocabulary modules.
- Supported Unity and AR module development by translating learning requirements into application features.

Augmented Reality Kids Game - Balloon Shot

- Developed an AR-based interactive kids game concept using immersive balloon-shooting gameplay.
- Designed child-friendly controls and feedback loops to improve engagement and gameplay clarity.

AI Avatar Assistant

- Built an AI-based virtual assistant prototype for conversational user interaction and intent-based responses.
- Applied natural language processing fundamentals to improve response handling and user experience.

AR Application with AI Integration

- Developed an AR application prototype with AI-enabled features and interactive visualization.
- Combined AR workflows with intelligent data processing to create a more responsive user experience.

Body Language Detector

- Implemented a machine-learning prototype for body language recognition using computer vision concepts.
- Applied visual detection and interpretation techniques for real-time human behavior analysis.

CERTIFICATES

- Intro to AR/VR/MR/XR: Technologies, Applications & Issues - University of Michigan via Coursera, completed with honors (Nov 2025)
- Machine Learning - Google Partnership through SkillBridge (July 2025)
- Human Computer Interaction - NPTEL Certificate (May 2025)
- Programming in Java - VITyarthi (March 2025)
- Fundamentals in AI/ML - VITyarthi (2024)
- Python Programming - VITyarthi (2023)

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Specialization: Gaming Technology | VIT Bhopal University | 2023 - 2027

Higher Secondary Education (12th)

MB International School, Kota | 2022

Secondary Education (10th)

Lions Public School, Kantabanji | 2020

EXTRACURRICULAR ACTIVITIES

National Cadet Corps (NCC)

11 (Odisha) BN | 2018 - 2019

- Earned NCC Certificate in 2019 under the Ministry of Defence, Government of India.

National Service Scheme (NSS)

Team Member | VIT Bhopal University

- Active participant in community service initiatives.
